

Dear Parents/Guardians,

I am pleased to inform you that your child (young person) has attended an introduction and been invited to participate in the Insain Visionworks™ program for 2023. The Program commences at Joseph Banks Secondary College in Week 2 of term 3.

The Insain Group Visionworks™ Program is designed to empower students to explore what they would like their future to look like, and to deliver on unpredictable and previously unattainable results.

Insain's unique technology allows for pathways to be paved that were once not there. Focusing on Social, Emotional, Biological, Educational and Career Growth, the weekly series of group sessions are designed for each young person to apply this approach in their lives, delivering on some phenomenal results.

During the 2-3 hour weekly sessions, your young person will gain access to, and begin discovering:

- Clarity around what they would like their future to look like
- Barriers that limit their ability to reach their true potential
- Opportunities and how to go about taking action
- Specific languaging to declare their vision and how to have others take action
- Tools to have their vision develop and continue, connecting with others who are allied and who provide beneficial support

Students are invited to apply to attend the program at the introduction and each application is reviewed carefully. We believe that getting into a young person's world and developing trust between students and our team is a necessary ingredient of a successful program, their vision of their future is ours too.

Successful applicants will continue to the Visionworks™ program, guided by an Insain Vision agent and will engage in a set of informal agreements to keep them on track.

We may also link your young person to a community member who can mentor them in their goals, and potentially go outside the classroom to do field work or meet with community members, etc. The students will be guided individually in the program, based on the knowledge they gain and the skills they demonstrate.

You may find asking your child about their experiences in the program helpful in understanding what we are asking students to do, and supporting your child during the program. As parents or guardians, you can encourage your young person to think about their future, though allowing them space in discovering it for themselves.

Please sign the consent form below and return it to the Student Services office to complete the applications for your young person's application and registration into the program as soon as possible.

Feel free to contact your school, or myself if you would like further information.

Yours truly,

Sain Dzemail  
CEO Insain Pty Ltd
